

### **Use of (generative) AI**

At JB Law, we strive to deploy (generative) artificial intelligence (AI) in the interests of our clients within our practice. We endorse the recommendations for responsible use of AI within the legal profession, as established by the Dutch Bar Association (Nederlandse Orde van Advocaten), and we train our people periodically to deploy AI in an effective, responsible and reliable manner within our practice. In addition to these recommendations from the Dutch Bar Association and the agreements we make with our clients regarding the use of (generative) AI, our information security and privacy policy also applies to the use of AI.
